

LOVE
your smile.

The KöR Whitening Deep Bleaching™ System was invented by internationally renowned cosmetic dentist and whitening expert Dr. Rod Kurthy. Thousands of dentists around the world agree that KöR Whitening is by far the most reliable and effective whitening system ever developed.

In fact, the KöR Whitening Deep Bleaching System is so effective, it is the only recognized whitening system that whitens even tetracycline-stained teeth in a short time (previously thought to be impossible). And now, these amazing KöR Whitening results are typically achieved with little to no sensitivity!

Dr. Rod Kurthy, the developer of the KöR Whitening Deep Bleaching System, whitened his own teeth!

This is what KöR Whitening can do for you!

The patient above was nearly 80 years old and thrilled with the results!

KöR Whitening can get even tetracycline-stained teeth white!
(As shown above and below.)

Shannon is not a model. Her smile was whitened with the KöR Whitening Deep Bleaching™ System from Evolve® Dental Technologies, and her teeth have not been retouched in any photographs throughout this brochure.

The KöR Whitening Deep Bleaching™ System is one of the most effective ways to add “WOW” to your appearance! Nothing whitens as beautifully; it’s sure to exceed your expectations.

We’ve Got the Answers to Your Questions...

• Why Does KöR Whitening Work so Well?

The KöR Whitening Deep Bleaching System works by restoring your teeth’s ability to absorb oxygen. The oxygen from its whitening gel is absorbed deeply into the tooth, dissolving stain molecules.

• How Long Does KöR Whitening Last?

Unlike other whitening methods, with easy periodic home maintenance, KöR Whitening is entirely permanent.

• Is it Safe?

Whitening products have been clinically studied and safely used on millions of patients without harm to teeth or gums. Whitening is considered entirely safe.

• Is There Pain or Discomfort with KöR Whitening?

Many have experienced pain during teeth whitening. Maybe you’ve experienced it yourself. After several years of research, development and clinical testing, the inventor of KöR Whitening introduced a whitening gel that, in most cases, produces little to no sensitivity. As a result, most patients have no discomfort from whitening when using this technique. Testing has shown that patients who do feel some sensitivity using KöR Whitening typically feel no more than 10% of the sensitivity they’d feel from other whitening gels.

• Does it Matter how Old I Am?

The ideal age to whiten teeth is about 14. The younger teeth are, the more brilliantly they whiten. However, KöR Whitening rejuvenates even older teeth back to their youthful ability to whiten incredibly well, even if you’re 90 years old.

• How White will my Teeth Get?

KöR Whitening whitens teeth dramatically, often lightening them 16 shades or more. Although everyone is different, with the proper KöR Whitening System, all teeth will have stunning results. It even whitens tetracycline-stained teeth!

• Will my Teeth Look too White and Unnatural?

No. Real teeth can’t look unnatural, they just look beautifully white. If you have seen people with ultra-white, fake-looking teeth, these were probably false teeth, teeth with porcelain crowns or veneers that may have been made too white and too opaque. You’ll get the ideal shade that’s right for you.

• Will my Crowns, Veneers or Fillings Whiten Too?

No. If you have any of these on your front teeth, you may need to replace some of them after whitening.

• How will Coffee, Tea, Smoking and Red Wine Affect my Teeth After Whitening?

With your easy home maintenance, these staining foods will have no effect on the brilliant color of your teeth.

• Will the Whitening Trays be Uncomfortable, Difficult to Sleep with or will the Bleach Leak out of the Trays?

No. KöR Whitening Deep Bleaching Trays are very different. They’re comfortable; because they’re thin and form-fitting, you’ll forget they’re even in your mouth. They’re convenient; by wearing these only while you sleep, it doesn’t interfere with your busy day. Also, unlike regular whitening trays, KöR Whitening Deep Bleaching Trays seal the bleach inside the tray, preventing the gel from quickly leaking into your mouth.

• How does the KöR Whitening Deep Bleaching System Work?

First, we’ll make molds of your teeth so you can have your own unique, ultra-comfortable KöR Whitening Deep Bleaching Trays. Then you’ll have a simple visit in the dental office, followed by wearing KöR Whitening Deep Bleaching Trays for two weeks at home while you sleep. The KöR Whitening Deep Bleaching System is completed with a final visit in the dental office.
